

SINGAPORE MATH CHALLENGE

INFO PACK 2025 INTERNATIONAL

About SINGAPORE MATH CHALLENGE

Overview

Introducing the Singapore Math Challenge (SMC), where we showcase the best practices in mathematics learning and provide students with a challenging platform to gauge their skills. Despite its worldwide reputation, Singapore Math needs constant energy and innovation to remain at the forefront of the field, and that's where SMC comes in.

Singapore's students have achieved top rankings in global benchmarking surveys such as The International Mathematics and Science Study (TIMSS) and the Programme for International Student Assessment (PISA), thanks to a strong foundation in primary mathematics. These surveys assess the students' understanding, application, and reasoning skills in Mathematics and Science in primary 4 (grade 4) and secondary 2 (grade 8).

We have partnered with Scholastic Trust Singapore Teachers' Institute (STSTI) to bring you SMC & SMGF as well as training for teachers on how to use Formative and Summative Assessment data to diagnose students' misconceptions about mathematics and plan lessons to correct these misconceptions.

Format of the Test

SINGAPORE MATH CHALLENGE is open to all students from G1 to G10/11 (Primary 1 to JC):

90 Minutes
Total Score: 100 points

Section A

15

Multiple choice Questions
2 points for each correct answer
0 point for each unanswered question
Total marks =30
